## **PROPOSAL 3**

Stetson Street Studio proposes to design and fabricate five aluminum sculptures for the Parks and Recreation Department, City of Fort Lauderdale, Florida.

1. Monarch Butterfly
2. Bumble Bee
3. Lady Bug
4. Angle fish
5. Flower Bouquet

Delivery to Fort Lauderdale and Installation Supervision is included. Installation by a City Facilities Crew is required.

### **Included in this proposal:**

1 powder coated aluminum **monarch butterfly sculpture**, black with translucent acrylic wing panels (orange and yellow). The butterfly is available in two widths: full wingspan (6 foot wide) or half wingspan (4 foot wide)

1 powder coated aluminum **bumble bee sculpture**, black with translucent acrylic yellow body panels and transparent (clear) acrylic wing panels (expected to become less transparent over time). 4 foot wingspan.

1 powder coated aluminum **lady bug sculpture**, black body and head with red wings, white eyes and black accents, using a layered aluminum technique (see sample photos). 2 bugs will be mounted face to face on a green aluminum "branch". Bugs will be 2 feet tall, branch will be 4 feet tall.

1 powder coated aluminum **angel fish sculpture**, black with opaque acrylic yellow body panels. 4 foot width.

1 powder coated aluminum **flower bouquet sculpture**, black with transparent acrylic yellow, red and orange body panels. 4 foot width.

Each sculpture will mount on a powder coated aluminum **support pole** with base plate.

Dimensions: 3.5" diameter, 10 feet tall, 1.5" x 12" square base.

The support poles are available in three finishes: silver, light green or dark green.

The poles are designed to be anchored in concrete using 4 Titan Concrete Anchor bolts each, 1/2" diameter, 5" long (Anchor Bolts not included).

*Each sculpture will have the capability to rotate in the wind.*

*An anti-theft option is available, at no extra cost, but this option negates the rotation feature.*

**Proposal Total**  
**\$17,950**

**Installation Requirements:**

Installation requires a concrete sidewalk or 5 concrete pads\*, concrete drill, 1/2" concrete bit, 2 man crew (minimum), 10 foot ladder.

\*Concrete pads should be 36" in diameter or a minimum of 24" square, with 4" above grade and 8" below grade.

A round pad is recommended to discourage skateboarders.

(These dimensions are a suggestion - consult a qualified engineer for accurate specifications)

*This project requires the site preparation be completed two weeks prior to delivery.*

*Site preparation is the responsibility of the City of Fort Lauderdale.*

*Any permitting for this project is the responsibility of the City of Fort Lauderdale.*

*Artist will provide one day of Installation Supervision upon delivery of sculptures.*

*This proposal is for the creation and fabrication of original artwork. The artworks described herein are copyrighted creations of Stetson Street Studio, DeLand, Florida.*

*Because of the fluctuating nature of the current economy, the prices quoted in this proposal are valid for 60 days from the date of issuance. Thereafter, the cost of materials may need to be recalculated.*

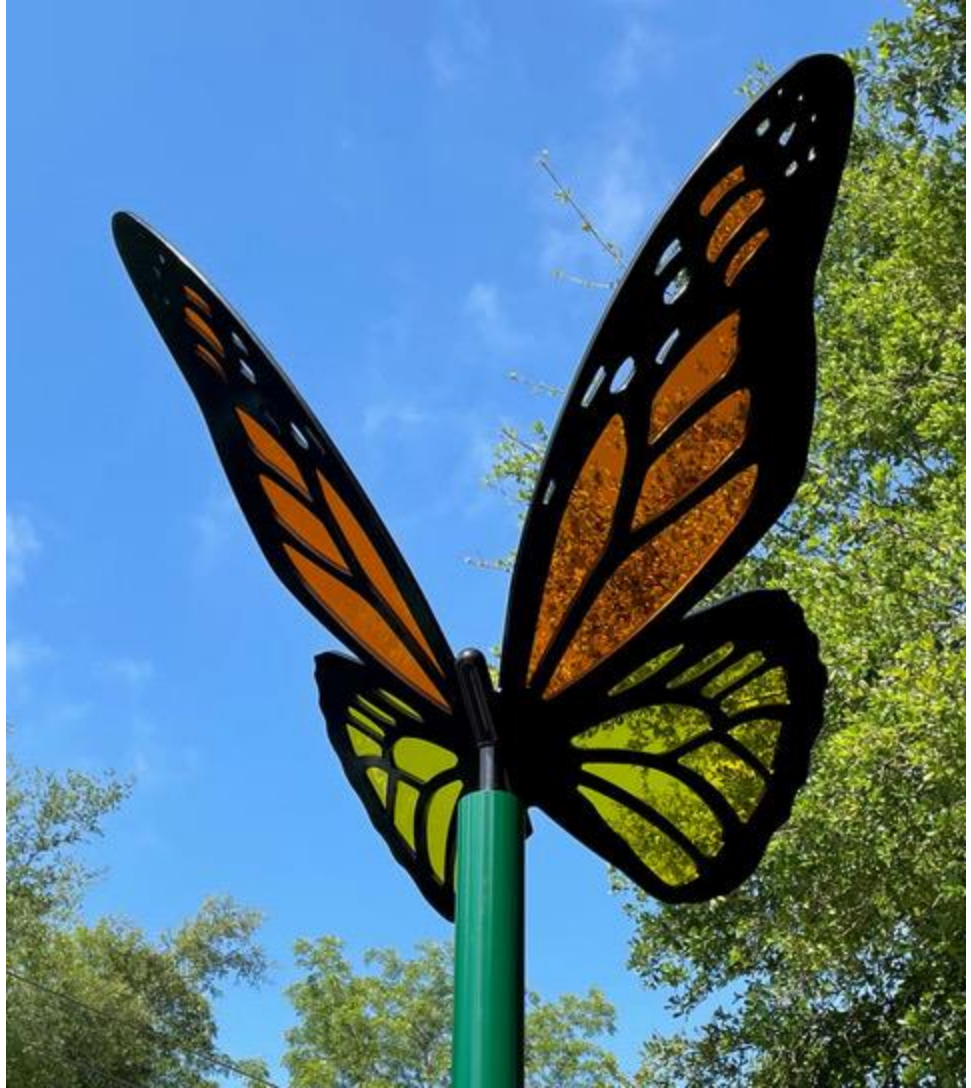

*A 50% deposit is required to begin this project. The deposit is due upon the execution of the contact or purchase order. The balance is due at the conclusion of the installation supervision day.*

*John Wilton*
