Page 5:	Technical Specifications

DEADLINE: Submittals must be received by 4:00 PM each business day. Pursuant to Section 47-24.12, the Department will review all applications to determine completeness within five (5) business days. Applicants will be notified via e-mail, if plans do not meet the submittal requirements and if changes are required.

NOTES: Prior to formal submittal of applications, applicants are encouraged to schedule an appointment with the Board Liaison and staff to obtain feedback regarding proposals. The meetings provide an opportunity for applicants to obtain feedback and general direction, prior to expending significant effort on preparation of submittal documents. Submit Board of Adjustment (BOA) application, fees and required documents electronically through LauderBuild <https://aca-prod.accela.com/FTL>.

FEES: All applications for development permits are established by the City Commission, as set forth by resolution and amended from time to time. In addition to the application fee, any additional costs incurred by the City including review by a consultant on behalf of the City, or special advertising costs shall be paid by the applicant. Any additional costs, which are unknown at the time of application, but are later incurred by the City, shall be paid by the applicant prior to the issuance of a development permit.

Page 2: Board of Adjustment (BOA) Criteria for Variance Request

Answer All questions on this page and attach narrative.

SPECIFIC REQUEST: State the specific request according to the ULDR or other provisions of the Code.

Variance to exceed allowable size and heights of 2 wall mounted ones. Sec. 47-15.23. (Table 1) & Sec. 47-22.3.F

CRITERIA: Applicant must demonstrate a unique hardship attributable to the land by proving by a preponderance of the evidence for all of the following criteria. Please answer the following criteria completely. While some criteria may seem duplicative the response should be tailored specifically to each. Per section 47-24.12. A.4,

a. Special conditions and circumstances affect the property at issue which prevent the reasonable use of such property; and This is in reference to Sec. 47-15.23. (Table1) & Sec. 47-22.3.F

This is a cruise terminal building that operates in Port Everglades and is one of eight buildings utilized by Port Everglades to support cruise business. The Port is expansive and offers multiple entry ways into the port property, as well as to the cruise terminal building in question...(See Narrative attached)

b. Circumstances which cause the special conditions are peculiar to the property at issue, or to such a small number of properties that they clearly constitute marked exceptions to other properties in the same zoning district; and:

Cruise passenger terminal 4 is located within Port Everglades (a maritime transportation district, unique to the county and the city) on the waterfront and serves cruise ships docking along the berth. (See Narrative attached)

c. Literal application of the provisions of the ULDR would deprive the applicant of a substantial property right that is enjoyed by other property owners in the same zoning district. (It shall be of no importance to this criterion that a denial of the variance sought might deny to the owner a more profitable use of the property, provided the provisions of the ULDR still allow a reasonable use of the property; and This is in reference to Sec. 47-15.23. (Table1) & Sec. 47-22.3.F

The purpose of the signage is to reach the cruising and tourism public, to be seen from a certain distance and view angle. The South and East facades of this cruise passenger terminal face the waterfront and are where the signs are proposed, for distance and viewing angle. (See Narrative attached)

d. The unique hardship is not self-created by the applicant or his predecessors, nor is it the result of mere disregard for, or ignorance of, the provisions of the ULDR or antecedent zoning regulations; and

The hardship is due to the fact that Cruise Terminal 4 is surrounded by other large structures (namely, the Heron Parking Garage, Convention Center and Convention Center Parking Garage) which block its visibility from most roadways. (See Narrative attached)

e. The variance is the minimum variance that will make possible a reasonable use of the property and that the variance will be in harmony with the general purposes and intent of the ULDR and the use as varied will not be incompatible with adjoining properties or the surrounding neighborhood or otherwise detrimental to the public welfare. This is in reference to Sec. 47-15.23. (Table1) & Sec. 47-22.3.F and also,

The intent of the ULDR designation for Port Everglades Development District (PEDD) is for marine related uses, including multiple cruise passenger terminals servicing cruise passengers from all over the world. The signage facing the waterfront has no impact to the surrounding neighbors or public welfare.

AFFIDAVIT: I, James Bowers the Owner/Agent of said property ATTEST that I am aware of the following:

1. In order to be entitled to the relief requested in the application an affirmative vote of a majority plus one of the Board of Adjustment is required;
2. That in granting the relief requested, the Board of Adjustment is limited to the authority vested in the Board by the ULDR and that the Board may not grant the relief requested unless the applicant proves all the criteria specified in the ULDR have been met;
3. That the granting of relief by the Board does not exempt the applicant or owner of record from the responsibilities of obtaining all applicable permits or approvals as may be required by law for both new and existing structures;
4. That if the relief requested is granted by the Board, the applicant must secure a building permit to implement the relief requested within one hundred eighty (180) days of the entry of the final order or the Board, or within such lesser time as the Board may proscribe and that failure to procure the necessary permits within the time so proscribed shall render the variance or special exception null and void;
5. That if the Board denies the request for relief, then no additional application for the same or substantially the same relief may be entertained by the Board within two (2) years of the date of entry of the final order of denial.

(Narrative)

2. Board of Adjustment (BOA) Criteria for Variance Request

a. Special conditions and circumstances affect the property at issue which prevent the reasonable use of such property; and

This is in reference to Sec. 47-15.23. (Table1) & Sec. 47-22.3.F

This is a cruise terminal building that operates in Port Everglades and is one of eight buildings utilized by Port Everglades to support cruise business. The Port is expansive and offers multiple entry ways into the port property, as well as to the cruise terminal building in question. **Because of that fact, as well as the fact that there is another cruise terminal building located immediately east of this building, as well as the convention center (and associated parking garage) immediately to the north, we believe additional signage is warranted to ensure cruise passengers do not get lost, arrive at the wrong terminal or park in the wrong garage.**

b. Circumstances which cause the special conditions are peculiar to the property at issue, or to such a small number of properties that they clearly constitute marked exceptions to other properties in the same zoning district; and:

Cruise passenger terminal 4 is located within Port Everglades (a maritime transportation district, unique to the county and the city) on the waterfront and serves cruise ships docking along the berth. **It is surrounded by other large structures (namely, the Heron Parking Garage, Convention Center and Convention Center Parking Garage) which block it's visibility from most roadways.**

c. Literal application of the provisions of the ULDR would deprive the applicant of a substantial property right that is enjoyed by other property owners in the same zoning district. (It shall be of no importance to this criterion that a denial of the variance sought might deny to the owner a more profitable use of the property, provided the provisions of the ULDR still allow a reasonable use of the property; and

This is in reference to Sec. 47-15.23. (Table1) & Sec. 47-22.3.F

The purpose of the signage is to reach the cruising and tourism public, to be seen from a certain distance and view angle. The South and East facades of this cruise passenger terminal face the waterfront and are where the signs are proposed, for distance and viewing angle. The terminal facility is surrounded by other structures, such as the Heron garage and Convention Center, thus the need to provide additional wayfinding.

d. The unique hardship is not self-created by the applicant or his predecessors, nor is it the result of mere disregard for, or ignorance of, the provisions of the ULDR or antecedent zoning regulations; and

The hardship is due to the fact that Cruise Terminal 4 is surrounded by other large structures (namely, the Heron Parking Garage, Convention Center and Convention Center Parking Garage) which block its visibility from most roadways.

This is a cruise terminal building that operates in Port Everglades and is one of eight buildings utilized by Port Everglades to support cruise business. The Port is expansive and offers multiple entry ways into the port property, as well as to cruise terminal 4. Because of that fact, and that Terminal 2 is directly to the east and the Broward County Convention Center is directly to the north, we believe additional signage is warranted to ensure cruise passengers do not get lost, arrive at the wrong terminal or park in the wrong garage. Lastly, Terminal 4 is hidden by the Heron garage which is directly to the west of terminal 4 and is used by other cruise lines.

South Facade: One way to access the cruise terminal building is from the south. The purpose of the south facade signage is to distinguish Terminal 4 and direct cruise passengers to the correct facility.

East Facade: The eastern façade will identify Terminal 4 for the use of Disney Cruise Line passengers. In the event passengers miss the north entrance to the Heron garage, the next Disney sign they see will be the one on the east façade assuring passengers that they are in the right place.

e. The variance is the minimum variance that will make possible a reasonable use of the property and that the variance will be in harmony with the general purposes and intent of the ULDR and the use as varied will not be incompatible with adjoining properties or the surrounding neighborhood or otherwise detrimental to the public welfare.

This is in reference to Sec. 47-15.23. (Table1) & Sec. 47-22.3.F and also,

The intent of the ULDR designation for Port Everglades Development District (PEDD) is for marine related uses, including multiple cruise passenger terminals servicing cruise passengers from all over the world. The signage facing the waterfront has no impact to the surrounding neighbors or public welfare.
