

Preliminary Proposal

Henry E. Kinney Tunnel – “Blooming Tapestry: A Vibrant Floral Symphony”

DOWNTOWN FT. LAUDERDALE

“Blooming Tapestry: A Vibrant Floral Symphony” by Danny Doya

Est. time of completion – 6 - 8 weeks

Artist Concept

“Blooming Tapestry: A Vibrant Floral Symphony”

Imagine yourself surrounded by a lush and captivating garden as you enter and exit the New River tunnel, where vibrant blooms and intricate foliage intertwine, creating a modern masterpiece of natural beauty. A design and color palette that evokes a sense of awe, tranquility, and wonder.

1. Color Palette: A harmonious color scheme that reflects the beauty of nature while also infusing a modern touch. Utilizing bold, eye-catching hues like fuchsia, electric blue, and golden yellow, alongside soft pastels or earthy tones for balance.
2. Flora and Fauna: The mural installation would be populated with a diverse array of flowers, plants, and possible wildlife native to the area, highlighting both local and exotic species. Incorporate intricate details in the petals, leaves, and stems to showcase the intricate beauty of nature. Considering integrating butterflies, hummingbirds, or other delicate creatures for added interest.
3. Seamless Integration/Modern Aesthetics: The composition will seamlessly blend with the surrounding environment. Infusing a touch of contemporary design into the mural. Geometric patterns, clean lines, and abstract representations will add a modern twist to the natural elements. Striving for a balance between organic shapes and structured forms.
4. Scale and Composition: The mural will be long and expansive, allowing viewers to immerse themselves in a captivating journey in and out of the tunnel. The composition will flow along the wall and different elements will interact with one another to create a cohesive and visually pleasing experience.
