

CITY OF FORT LAUDERDALE

DRAFT

**MEETING MINUTES
CITY OF FORT LAUDERDALE
MARINE ADVISORY BOARD**

FORT LAUDERDALE FIRE RESCUE DEPARTMENT – STATION #2

528 NW 2ND STREET, FORT LAUDERDALE, FLORIDA 33311

3RD FLOOR CONFERENCE ROOM

THURSDAY, JULY 6, 2023 – 6:00 P.M.

**Cumulative Attendance
January-December 2023**

Steve Witten, Chair	P	6	0
James Harrison, Vice Chair	A	4	2
Michael Boyer	A	4	2
Tyler Brunelle	P	4	0
Robyn Chiarelli	A	3	3
Barry Flanigan	P	6	0
Robert Franks	P	1	0
Elisabeth George	P	6	0
Brewster Knott	A	4	2
Norbert McLaughlin	P	6	0
Noelle Norvell	P	4	2
Ed Rebholz	P	3	0
Robert Washington	P	3	0

As of this date, there are 13 appointed members to the Board, which means 7 would constitute a quorum.

Staff

Andrew Cuba, Marine Facilities Manager
Jonathan Luscomb, Marine Facilities Supervisor
Sergeant David Sanguini, Fort Lauderdale Police Department

Communications to City Commission

None.

I. Call to Order / Roll Call

The meeting was called to order at 6:00 p.m. and roll was taken.

Chair Witten advised that the Marine Advisory Board (MAB) would not meet during the month of August.

All present observed a moment of silence in memory of Isabelle Harrison, wife of Vice Chair James Harrison.

Incoming Board member John Lynch introduced himself at this time. Mr. Cuba noted that he will formally join the Board at their September 2023 meeting.

The following Items were taken out of order on the Agenda.

III. Statement of Quorum

It was noted that a quorum was present at the meeting.

IV. Waterway Crime & Boating Safety Report

Sergeant David Sanguini of the Fort Lauderdale Police Department's Marine Unit reported the following activity for June 2023:

- 82 incidents
- 64 citations
- 3 boating accidents
- 4 waterway crimes

Sgt. Sanguini concluded that no major issues were reported on the Fourth of July.

II. Approval of Minutes – June 1, 2023

Motion made by Ms. George, and duly seconded, to approve. In a voice vote, the **motion** passed unanimously.

Chair Witten stated that he and Mr. Cuba had attended the July 5, 2023 City Commission meeting, at which a dock waiver application for 801 SW 6th Street was granted. This waiver permits a 50 ft. extension into the waterway with a deed restriction. Waivers were also granted to properties on Solar Isle, 20th Street, and 321 N Birch Road. Chair Witten emphasized the importance of the Board members' communication about the proposed moratorium on waivers on the New River to the public.

V. Presentation – Industry Expert – Types of Pile / Robert Washington

Chair Witten explained that, going forward, he would like to regularly schedule brief presentations by marine industry experts. He encouraged the members to send their ideas on future speakers to Mr. Cuba's office, which could share these communications with the full Board.

Board member Robert Washington gave a presentation on types of pile used throughout the City in marine construction, including bridges, seawalls, foundations, and other structures. He recommended a clear understanding of the different types of pile that can

be used, as these can have different environmental ramifications, particularly if they are not properly installed.

Mr. Washington noted that work such as dredging, as well as the vibrations from traffic and vibrations caused by pile installation, can affect the waterway by compromising seawalls. Information is collected from engineers on the ground when determining whether or not to use a vibratory hammer. Factors to be considered may include the proximity of nearby buildings, the condition of the ground, and the type of pile used.

Chair Witten asked why a property owner might choose to use sheet pile rather than poured concrete. Mr. Washington replied that salt water can cause concrete to deteriorate. Sheet pile is more expensive but typically more effective.

Chair Witten also asked if there are long-term benefits to the use of sheet pile. He noted that water from behind the seawall can affect the integrity of the structure as much as water from the canal. Mr. Washington explained that the life expectancy of sheet pile is much longer than that of concrete; in addition, it can be placed deep enough to withstand the effects of waterway dredging.

Mr. Washington continued that too much vibration can disturb the foundation of a standing building, particularly if it is an older structure. Mr. McLaughlin further clarified that these vibrations are measured by seismographs. This can protect a contractor, as nearby structures which cannot withstand certain levels of vibration would also be unlikely to withstand other forces, such as hurricanes or earthquakes.

Mr. McLaughlin added that while many seawalls are constructed using shell rock, this material is not as strong as sheet pile and cannot be driven as far into the ground. Sheet pile is driven until it hits bedrock, which results in greater vibrations throughout the area.

Chair Witten asked why a property owner would choose to use wooden or concrete piles. Mr. Washington replied that this depends upon the application. Mr. McLaughlin added that if concrete piles are not combined with the protection of wooden piles, this can result in problems, as concrete piles can crack easily and may not last as long as wooden piles.

VI. Discussion – New River Navigational Concerns / Moratorium Update

Chair Witten recalled that this will be a recurring Agenda Item for discussion each month. He noted that the Board has received correspondence from a number of residents and businesspeople, including former MAB members. The information submitted with this correspondence has been sent to Assistant City Attorney Bob Dunckel, who is working to craft language that could be used to invoke a temporary moratorium .

Chair Witten noted that the parts of the New River that would be affected by a moratorium include several “pinch points,” such as the area between Marker 10 and Collee Hammock, as well as an area approaching Bradford Marine. There is ongoing discussion of other

changes that may be necessary, such as reconsideration of the current 30%/25 ft. waterway extension regulation.

Mr. McLaughlin expressed concern that when homeowners receive a variance, the variance must be enforceable by the Marine Unit. He recommended that variances reflect the furthest extension of any items into the waterway, including vessels docked at the structure. Owners may wish to replace an existing boat with a larger one, or the property may be sold to an owner who believes they can dock a boat of any size.

Chair Witten advised that a deed restriction is public record, which would also make enforcement easier. He noted that the approval granted by the City Commission to the property at 801 SW 6th Street, for example, allows a maximum extension of 50 ft. from the property, which in this case would be the location of a piling.

Chair Witten asked if a Marine Unit Officer would be provided with a list of how far vessels or structures can extend into the waterway. Ms. Norvell pointed out that Code Enforcement would be responsible for looking into violations of a deed restriction.

Ms. Norvell recalled that the Board had originally discussed the possibility of a moratorium which would allow time to change Code rather than recommending greater enforcement measures from the City. Chair Witten observed that while the moratorium would be aimed at development along the New River, changes in regulations such as the 30%/25 ft. extension rule could affect other waterfront properties in Fort Lauderdale. He suggested that one possible change could be a prohibition against perpendicular docks or perpendicular boat lifts on the New River.

Mr. McLaughlin advised that a property owner's dock or pilings follow the contours of their property line; however, when a boat is docked at that property, it might extend beyond the limitation. He noted that this is common for unusually-shaped pieces of property. Mr. Brunelle pointed out that the moratorium would affect waivers, which are not law. Neither the Board nor the City Commission is required to recommend or approve a waiver request.

Mr. Brunelle continued that the Board has communicated to the public that the moratorium would apply to waivers rather than to the law. If they instead focused on changing the regulations governing extensions into the waterway, there could be significantly more resistance from citizens.

Chair Witten noted that if perpendicular docking or boat lifts are not permitted, the 30% rule makes more sense, as few vessels are 50 ft. wide. Mr. Brunelle agreed that another consideration would be how to prevent boat owners from docking larger vessels at their property than a waiver was intended to accommodate. The size restriction would apply not only to the current owner, but to any future owners of the same property.

Mr. Cuba confirmed that a change to the 30%/25 ft. rule would likely require a vote by the City Commission, but perhaps not a public referendum. He pointed out that in the past, the MAB was instrumental in changing the City's Ordinance governing boat lifts. At one time, the distance at which boat lifts could be placed was significantly more restrictive, and the Board had recommended a change to the City Commission.

It was asked if any change to 30%/25 ft. rule would allow for grandfathering. Ms. Norvell pointed out that a change to waiver policy would not be a major issue for the City, while a change to regulations on the New River would pose a greater concern to the marine industry, tourism, and the interests of residents. Mr. Brunelle added that a moratorium would give residents additional time to understand there may be changes coming to waterway regulations.

Patience Cohn, representing the Marine Industries Association of South Florida (MIASF), reported that bathometric surveys are being conducted of some areas of the New River to show the exact location and depth of the navigable channel of the waterway.

Ms. Norvell emphasized the importance of communication to the public in relation to the proposed moratorium, pointing out that real estate agents who are actively selling waterfront properties may not be aware of this discussion. She also recalled that the Marine Unit has indicated that Code Enforcement Officers have traveled the waterways with them in the past; however, now Code Enforcement has their own vessel, but does not enforce waterway issues and has instructed residents reporting waterway Code violations to instead contact the Police Department.

VII. Old / New Business

Chair Witten advised that there has been previous discussion of requesting identification badges for MAB members who may want to view properties for which waivers have been requested. He asked that any interested members inform him if they wished to have these cards.

Chair Witten continued that while the Board's short-term goal at present is the proposed moratorium on waivers, they should also keep long-term goals in mind as well. Possible issues may include the loading/offloading of materials by contractors, as well as the health and safety of the City's waterways, which can be compromised when boaters illegally discharge waste into the water.

Mr. McLaughlin stated that he would like the Board to discuss dredging regulations for waterways, as well as new seawall regulations. The City has changed the scale by which seawall height is monitored: current regulations require a minimum seawall height of 3.9 North American Vertical Datum (NAVD), which is the same as National Geodetic Vertical Datum (NGVD) of 5.5. Residents may not be aware that these two measurements represent the same height as determined by the two different scales.

It was asked that the expected outcome of the proposed moratorium be clarified. Chair Witten explained that property owners come before the Board with requests to extend their structures or boats farther into the water than allowed by Code. Over time, the Board has seen the extension of these structures “choke off” the New River. By the end of the proposed moratorium, they hope the City Commission will have come up with a clear outline of what is and is not acceptable on the New River. The Board hopes to be involved in this process, as its members represent the marine industry and recreational boaters and have developed expertise on waivers.

The Board members briefly discussed a proposed 25 ft. observation dock planned for the “Little Florida” area of the New River, which, if constructed, could disrupt the navigation of barges or those towing other boats in that area. It was stated that the marine industry should reach out directly to the property owner in this case. It was also suggested that the Board invite a member of the U.S. Coast Guard to a future meeting to discuss how they have ensured navigability on the Miami River.

The Board members were encouraged to attend City Commission meetings, as well as the meetings held by individual Commissioners in their districts, to show their ongoing involvement with marine issues in the City. Members of the marine industry were also advised to have a presence at these meetings.

Mr. Washington advised that there is an educational YouTube video available on living seawalls.

VIII. Adjournment

There being no further business to come before the Board at this time, the meeting was adjourned at 7:17 p.m.

Any written public comments made 48 hours prior to the meeting regarding items discussed during the proceedings have been attached hereto.

[Minutes prepared by K. McGuire, Prototype, Inc.]

ITEM VI

MEMORANDUM MF NO. 23-20

DATE: July 20, 2023
TO: Marine Advisory Board
FROM: Andrew Cuba, Manager of Marine Facilities
RE: September 7, 2023 MAB - Dock Waiver of Distance Limitations
-Bruce Jeffery; 848 NE 20th, LLC / 848 NE 20th Avenue

Attached for your review is an application from Bruce Jeffery; 848 NE 20th, LLC / 848 NE 20th Avenue (see **Exhibit 1**).

APPLICATION AND BACKGROUND INFORMATION

The applicant is requesting approval for the installation of one (1) Finger Pier. The distance this structure extends from the property line into the Middle River is shown in the survey in **Exhibit 1** and summarized in **Table 1** below:

TABLE 1

PROPOSED STRUCTURE	STRUCTURE DISTANCE FROM PROPERTY LINE	PERMITTED DISTANCE WITHOUT WAIVER	DISTANCE REQUIRING A WAIVER
Finger Pier	48.4'+/-	25'	23.4'+/-

ULDR Section 47-19.3 C. limits the maximum distance of mooring structures to 25 feet or 25% of the width of the waterway, whichever is less. Section 47.19.3.E authorizes the City Commission to waive this limitation based upon a finding of extraordinary circumstances. The applicant has specified that the extra distance for the finger pier is necessary for safely mooring vessels, especially during high wind events and severe weather, and to protect vessels from high wave energy due to excessive wakes.

PROPERTY LOCATION AND ZONING

The property is located within the ROA Limited Residential / Office / Medium High Density Zoning District. It is situated on the Middle River where the distance from wet face to wet face on the opposite side of the Middle River is 281 feet+/-, according to the Summary Description provided in **Exhibit 1**.

DOCK PLAN AND BOATING SAFETY

Marine Facilities records reflect that there have been eighteen (18) waivers of docking distance limitations approved by the City Commission since 1983 within close proximity. A comparison of these are shown in **Table 2**, including the maximum distances of all structures extending into the Middle River:

TABLE 2

DATE	ADDRESS	MAXIMUM DISTANCE
March 1983	834 N.E. 20 th Avenue	Pilings – 45'
April 1983	714 N.E. 20 th Avenue	Pilings – 45' Piers – 37'
July 1985	808 N.E. 20 th Avenue	Pilings – 48' Piers – 38'
January 1990	840 N.E. 20 th Avenue	Pilings – 48' Pier – 48'
September 1992	738 N.E. 20 th Avenue	Pilings – 75' Pier – 39'
November 2007	810 N.E. 20 th Avenue	Pilings – 68' Piers – 73'
January 2008	852 N.E. 20 th Avenue	Pilings – 86' Pier – 49'
October 2008	714 N.E. 20 th Avenue	Pier – 108'
November 2012	810 N.E. 20 th Avenue	Pilings- 124.4'
May 2013	720 N.E. 20 th Avenue	Pilings-80' Pier-42'
May 2013	816 N.E. 20 th Avenue	Pilings-112.4'
March 2014	704 N.E. 20 th Avenue	Pilings – 125'
October 2014	720 N.E. 20 th Avenue	Pilings-125'
November 2014	726 N.E. 20 th Avenue	Pilings-125'
February 2015	824 N.E. 20 th Avenue	Pilings-106.3'
January 2016	900/910 N.E. 20 th Avenue	Pilings – 80.3'
November 2017	800 N.E. 20 th Avenue	Pilings – 100'
July 2023	900/910 N.E. 20 th Avenue	Pier – 68.7'

RECOMMENDATIONS

Should the Marine Advisory Board consider approval of the application, the Resolution under consideration by the City Commission should include at least the following as prescribed in the ULDR and City Code of Ordinances:

1. The applicant is required to comply with all applicable building and zoning regulations as well as any other Federal and State laws and permitting requirements including the Broward County Environmental Protection and Growth

Management Department, the Florida Department of Environmental Protection and the U.S. Army Corps of Engineers.

2. As a general condition of approval and in order to review for final consistency with construction of facilities in accord with this application and City building permits the applicant is required to provide City Staff with copies of "As Built" drawings from a certified and licensed contractor.

EXHIBIT II SUMMARY DESCRIPTION

Summary Description
848 NE 20th Avenue
TCG Project No. 23-0010

The project site is located along the Middle River at 848 NE 20th Avenue, in Section 01, Township 50, Range 42, in the City of Fort Lauderdale, Broward County, Florida.

The property is located along the Middle River, which is a tidal water. The nearest direct connection to the Atlantic Ocean is approximately 3 miles to the southeast at the Port Everglades Inlet. As the project site is located along the Middle River, the incoming tidal waters (flood) at the site move to the northwest and the outgoing waters (ebb) move to the southeast.

The project site consists of an existing ± 60 in. ft. concrete seawall, ± 274 sq. ft. wooden dock configuration, and twelve (12) wood mooring piles. The proposed project consists of the removal of ± 274 sq. ft. wooden dock and twelve (12) mooring piles; the installation of a 60 in. ft. concrete panel seawall with 3.0' concrete cap, seven (7) 12-inch king piles, seven (7) 12-inch batter piles, and the installation of a ± 502 sq. ft. concrete marginal dock with a 5'x40' (200 sq. ft.) finger pier to safely accommodate the existing slips on site. The slips will be consistent with the mooring piles and docks adjacent to the property along the Middle River. As measured from the property line, the proposed finger pier will encroach more than 25' from the property line into the Middle River. As this distance is over the allowable 25' distance into the waterway from the property line, the proposed finger pier will require a variance waiver.

The proposed structures are being applied for concurrently with the Broward County Resilient Environmental Department, the Florida Department of Environmental Protection, and the US Army Corps of Engineers.

The following four (4) matters provide justification for this waiver request:

1. All structures will not exceed 25% of the width of the waterway.
2. Due to the extraordinary width of the waterway at this location from wetface to wetface ($\pm 281'$), the proposed project will not impede navigation within the Middle River.
3. The proposed structures are necessary for safe mooring of vessels, especially during high wind events and severe weather.

4. The proposed structures are also necessary to protect the vessels from high wave energy from excessive boat wakes along the Middle River. High wave energy is caused by the adjacent water ski zone in the Middle River and high boat traffic through the channel.

If this waiver is approved, the applicant will comply with all necessary construction requirements stated in Section 47-19.3 (C)(D)(E).

WARRANTY DEED

(STATUTORY FORM – SECTION 689.02, F.S.)

This indenture made the 2nd day of February, 2023 between Donald P. Rubenstein, a single man, whose post office address is 5766 Duckweed Road, Lake Worth, FL 33449, of the County of Palm Beach, State of Florida, Grantor, to 848 NE 20TH, LLC, a Florida Limited Liability Company, whose post office address is 804 Ashley Avenue, Brielle, NJ 08730, State of New Jersey, Grantee:

Witnesseth, that said Grantor, for and in consideration of the sum of TEN DOLLARS (U.S.\$10.00) and other good and valuable considerations to said Grantor in hand paid by said Grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said Grantee, and Grantee's heirs and assigns forever, the following described land, situate, lying and being in Broward, Florida, to-wit:

Lot 11, Block 1, Gateway, according to the map or plat thereof, as recorded in Plat Book 25, Page(s) 24, of the Public Records of Broward County, Florida.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

Subject to taxes for 2023 and subsequent years, not yet due and payable; covenants, restrictions, easements, reservations and limitations of record, if any.

TO HAVE AND TO HOLD the same in fee simple forever.

And Grantor hereby covenants with the Grantee that the Grantor is lawfully seized of said land in fee simple, that Grantor has good right and lawful authority to sell and convey said land and that the Grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever.

In Witness Whereof, Grantor has hereunto set Grantor's hand and seal the day and year first above written.

CONSTRUCTION BARGE (TYP.)

LEGEND

- Pile Locations
- ▨ Dredge Or Fill Area
- Mooring Buoy w/Anchor
- Anchor
- Barrier Movement Due To Current Action

Note:
Turbidity barriers for flowing streams and tidal creeks may be either floating, or staked types or any combinations of types that will suit site conditions and meet erosion control and water quality requirements. The barrier type(s) will be at the Contractors option unless otherwise specified in the plans, however payment will be under the pay item(s) established in the plans for Floating Turbidity Barrier and/or Staked Turbidity Barrier. Posts in staked turbidity barriers to be installed in vertical position unless otherwise directed by the Engineer.

1. Turbidity barriers are to be used in all permanent bodies of water regardless of water depth.
2. Number and spacing of anchors dependent on current velocities.
3. Deployment of barrier around pile locations may vary to accommodate construction operations.
4. Navigation may require segmenting barrier during construction operations.
5. For additional information see Section 104 of the Standard Specifications.

City of Fort Lauderdale Waiver Request

Dear Mr. Jeffery,

I have reviewed the plans for the proposed project to install a finger pier beyond 25 feet from the property line into the Middle River. I understand that the proposed project will require a waiver of limitations through the City of Fort Lauderdale along with permitting through the regulatory agencies. I reside at 840 NE 20th Avenue and support the project as proposed.

Sincerely,

Rose Ann Lovell

ITEM VII

MEMORANDUM MF NO. 23-19

DATE: July 18, 2023

TO: Marine Advisory Board Members

FROM: Andrew Cuba, Marine Facilities Manager

RE: February 2, 2023 MAB Meeting – Application for Dock Permit – 817 RIO LLC; Cabot Edewaard / 817 Cordova Road

Attached for your review is an application from 817 RIO LLC; Cabot Edewaard / 817 Cordova Road.

APPLICATION AND BACKGROUND INFORMATION

At the March 23, 2023 City Commission Meeting, this applicant was granted a Dock Permit for usage of the property abutting the waterway adjacent to 817 Cordova Road for a 47'+/- long x 8'+/- wide marginal dock with access steps. The applicant wishes to complement this dock with a 20,000 pound 4 post boat lift, extending a maximum of 24'4" +/- from the wet face of the seawall into Lake Juanita. City Code Section 8-144 authorizes the construction and use of docks on public property, and allows for the permit to be issued provided the permit holder agrees to maintain the improvements and seawall.

PROPERTY LOCATION AND ZONING

The property is located within the Rio Vista Isles RS-8 Residential Low Density Zoning District. The dock area is directly adjacent to Lake Juanita with direct access to the Intracoastal Waterway.

ENGINEERING REVIEW REQUIREMENT

As a requirement of City Code Section 8-144, approval of the application is contingent upon all improvements to the property being maintained in accord with City Engineering standards and in full compliance with building and zoning regulations including construction permits required for any future electrical and water feeds to the property.

The granting of this Permit is subject to all of the provisions of City Code Section 8-144 as well as the following terms and conditions, violation of any of which shall be grounds for revocation of the Permit:

1. The permit to use the docks shall expire upon the: (i) abandonment of the use of the dock; or (ii) recordation of the deed of conveyance transferring title to the upland parcel; or (iii) termination, expiration or revocation of the dock permit by the City Commission, whichever (i),(ii), or (iii) shall first occur.
2. Upon expiration of the permit to use the dock, the permit holder shall be obligated to remove the dock and all appurtenances thereto no later than three (3) months after the termination, revocation or expiration of the permit to use the dock.
3. Signage such as "private dock" may be placed on the dock within the dock area, but not upon or within the public swale area.

4. Only vessels owned by the permit holder and registered with the City as part of the dock permit application may be moored at the permitted dock.
5. During the term of the dock permit, the permit holder shall be required to repair, replace, reconstruct or maintain the dock or adjacent seawall or both to meet the requirements of City Code 8-144 (7) and ULDR section 47-19.3 (f.) (4.). The public swale area shall be landscaped in accordance with the established landscape plan for the area in question adopted by the Department of Sustainable Development.
6. All improvements such as docks, seawalls and the like which are placed upon the public dock area or within the dock permit parcel or within the dock area and public swale area by a private person shall be constructed with appropriate permits from all applicable agencies. Maintenance and repairs shall be performed according to City Engineering standards and all applicable regulatory codes.
7. The public swale area shall be kept open at all times as means of reasonable ingress and egress to the public, but the permit holder shall have the right to exclude the public from the dock area.
8. Vessels berthed within the Dock Area must not encroach into the northerly or southerly extension of the 5' set-back required for the RS-8 zoning district for Applicant's (Permit Holder's) Property.
9. All installed docks must be either (i) floating docks that can adapt to seal level rise over their useful life span; or (ii) fixed docks installed at a minimum height consistent with the requirements of section 47-19.3(f); or (iii) fixed docks the height of which are even with the City's seawall, whichever (ii) or (iii) is the greater.
10. Except as to a tender, there shall be no rafting of vessels from the moored vessel.
11. The permit shall guarantee from the permit holder to the city to indemnify and hold the city harmless for any damage or injury to any person using such facilities.
12. Per 8-144 (6), penetration of the City's seawall to support the dock of attach improvements is prohibited, barring specified considerations.
13. The Applicant is required to install and affix reflector tape to the proposed boat lift wood outer piles. The reflector tape must be formulated for marine use and be in one (1) of the following uniform colors: international orange or iridescent silver. On all such piles, the reflector tape shall be at least five (5) inches wide and within eighteen (18) inches of the top of the pile.
14. The Applicant has the responsibility to execute and deliver a Declaration of Covenants Running With the Land Respecting A City Issued Dock Permit to the City Attorney's Office no later than ten (10) days prior to the Commission meeting date.
15. The violation of any provisions of Code Section 8-144 or violations of any of the terms or conditions relative to the granting or renewal of a dock permit shall be unlawful and may constitute cause for revocation of the permit.

Dear Marine Advisory Board,

I desire to have a dock at 817 Cordova Road, Fort Lauderdale, FL 33301. The plans are for a dock measuring 8' x 47' on 12 wood piles with a 20,000# 4-post Neptune boatlift G3 Speed, to be built respecting all applicable guidelines. No construction has started.

I do not own a boat at the moment.

Respectfully,

A handwritten signature in black ink, appearing to read 'CC Edewaard', written in a cursive style.

Cabot C Edewaard, Managing Director of 817 Rio LLC

Prepared by:

2. Licensed contractor shall verify the existing conditions prior to the commencement of the work. Any conflicts or omissions between existing conditions or the various elements of the working drawing shall be brought to the attention of the Engineer prior to the commencement of the work. The Licensed Contractor and all subcontractors are responsible for all lines, elevations, and measurements in connection with their work.
3. Do not scale drawings for dimensions.
4. Any deviation and/or substitution from the information provided herein shall be submitted to the Engineer for approval prior to commencement of work.
5. All unanticipated or unforeseen demolition and/or new construction conditions which require deviation from the plans and notes herein shall be reported to the Engineer prior to commencement of work.
6. All new work and/or materials shall conform to all requirements of each administrative body having jurisdiction in each appertaining circumstance.
7. All new materials and/or patchwork shall be provided to match existing materials and/or adjoining work where practical except as specifically noted herein.
8. Licensed Contractor to shall use all possible care to protect all existing materials, surfaces, and furnishings from damage during all phases of construction.
9. Licensed Contractor to verify location of existing utilities prior to commencing work.
10. The Licensed contractor to install and remove all shoring and bracing as required for the proper execution of the work.
11. Licensed Contractor to obtain all permits as necessary from all Local, State, and Federal agencies.
12. Turbidity barriers to be marked with site contractor's company name using permanent markings no smaller than 3 inches in height on the top of the barrier.

PILE DRIVING:

1. Piles shall be driven using an approved cushion block consisting of material so arranged so as to provide the transmission of hammer energy.
2. Piles shall be driven to a minimum allowable bearing capacity of 10 tons for wood, and 25 tons for concrete, a minimum of 8' into berm or refusal.
3. Piles shall be driven with a drop hammer or gravity hammer provided the hammer shall weight no less than 3,000 pounds, and the fall of the hammer shall not exceed 6'.
4. Piles shall be driven with a variation of not more than $\frac{1}{4}$ inch per foot from the vertical, or from the batter line indicated, with a maximum variation of the head of the pile from the position shown on the plans of not more than three inches.
5. Where piling must penetrate strata offering high resistance to driving, the structural engineer of record or special inspector may require that the piles be set in pre-drilled or punched holes. The piles shall reach their final penetration by driving.

PILE NOTES:

1. Wood piles to be 2.5 lb. CCA treated in accordance with AWPA standard C18.
2. Wood piles shall be a minimum diameter of 10", Miami Dade County requires minimum diameter of 12".

WOOD DOCK NOTES:

1. All materials to be pressure treated pine unless otherwise noted.
2. All frame work materials to be Southern Pine Grade #1
3. All Decking materials to be grade #1 unless otherwise noted.
4. All hardware to be Stainless Steel or Galvanized unless otherwise noted.
