 City-wide Inflow and Infiltration Reduction Program (P12214)  
 Sanitary Sewer Smoke Testing – Rear Yard Easement Access

Property Access:	
Owner Name(s) or Tenant Name(s):	
Phone Number:	
Email Address:	

Dear Property Owner or Tenant,

As part of the City of Fort Lauderdale’s ongoing Inflow and Infiltration (I&I) Reduction Program, the City and its engineering consultant, Ardurra Group Inc., are conducting smoke testing of the sanitary sewer system, including areas within rear-yard easements where public sewer lines or service laterals are located.

To carry out this work, we respectfully request access to the sanitary sewer easement located at the rear of your property. Testing may require temporary access by personnel and equipment to perform visual observations of the system. The work will be non-invasive, and no digging or permanent modifications will be made.

All personnel will carry identification and take all reasonable measures to avoid disruption. The results will help identify potential sources of I&I and ensure the reliability and efficiency of the City’s wastewater system.

**REQUEST FOR ACCESS AND CONSENT FORM**

The City and its representatives, including Ardurra Group Inc., are requesting access to the rear portion of your property identified above for the sole purpose of conducting smoke testing and related inspections within the designated sanitary sewer easement. Please review the access details below and indicate your decision.

**ACCESS DETAILS**

- Property owners **do not need to be present** during the inspection.
- Crews will access the rear easement **through unlocked side gates or open pathways** only.
- If special arrangements are required (e.g., pets, locked gates), please contact us or note them below.

**CONSENT DECISION**

Please check one box:

- I consent to rear yard access for smoke testing activities.
- I do not consent to rear yard access.

**ADDITIONAL NOTES (optional)**

---

---

---

By signing below, I confirm my understanding and decision regarding the access request. This consent is valid for the duration of the testing effort, not to exceed 30 days from the date signed, unless otherwise extended in writing. Thank you for your cooperation in improving our community’s infrastructure.
